INFORMATIONAL MEETING THIS MONDAY

October 6 7:30pm • Trinity Communion Church

Greenlight is an internet service provider that uses fiber optic lines to offer faster internet. They have just come to our neighborhood (Winona Woods) and are taking signups for installations. They won't be back for several months so we want to make everyone aware of this opportunity. If you are interested, feel free to join the meeting or find out more information and contact us on our website.

Winona Woods Neighborhood Association has no affiliation with Greenlight Networks, our sole aim is to provide information to the neighborhood regarding an alternate option for internet service.
